

## Our commitment to our employees and customers regarding the threat of COVID-19

Dear customers,

Sepiolsa, world leader in the production, extraction and commercialization of specialty clays, committed to its quality, food safety and environmental protection policy, has implemented a Contingency Plan with a package of preventive measures to face this special situation regarding COVID-19.

The objective of Sepiolsa's Contingency Plan is to ensure the safety and health of all Sepiolsa workers, partners, customers and suppliers by preventing a possible transmission of COVID-19 in a complicated and frequently changing situation.

The implemented measures, in line with the Health Ministry recommendation, are as follows:

- We have applied the hygiene protocols issued by the health authorities affecting our staff and company partners visiting our premises by using internal communications and information panels in all work zones.
- All movements of our employees using public transport have been cancelled inside and outside of Spain. All face to face meetings will now be conducted via telephone or videoconference.
- All employees whose work can be carried out remotely are now working from home.

Despite the state of emergency declared in Spain we would like to assure you that our production continues under normal conditions. We guarantee continued supply to our customers maintaining quality standards as defined in our Quality Control and Food Security system.

Our activities can still be affected by future measures announced by the central and regional governments and the health authorities. We pay close attention to any new developments and we will inform you of any relevant changes to the situation.

Please do not hesitate to contact us with any questions you may have. We are confident that with your understanding and collaboration we will soon be able to return to a normal situation.

Yours faithfully,

Sepiolsa Management
